MaxiFlex Endurance Open Back

Code: 42844

Features

- Unit: Pair
- Size: 7/S, 8/M, 9/L, 10/XL, 11/2XL
- Coating: Foam Nitrile
- Colour: Grey/Black
- Liner Fabric: Nylon/Lycra
- EN 388:2016: 4131

Product Details

MaxiFlex Endurance is a general handing glove that features patented 360° breathability micro-foam, making it the most breathable glove on the market today. It is ideal for assembly work, maintenance, warehousing, gardening, and DIY jobs.

Why would you buy this glove over any of its competitors? There isn't just one reason, there's a laundry list of reasons.

The first we've already mentioned – the MaxiFlex Endurance features our patented 360° breathability micro-foam nitrile coating. This advanced coating makes it the most breathable glove on the market, so your hands will stay cool and comfortable while you're wearing a pair of these gloves.

Not only that, but our MaxiFlex Endurance also are 25% thinner than most nitrile gloves, but offers *twice* the mechanical performance. This means you're getting added comfort and dexterity, without compromising on performance.

The glove is also designed to mimic the hand while resting, reducing fatigue, so you can wear the gloves for longer without getting tired. The glove also features our GripTech "micro-cup" finish, giving you improved gripping capabilities, which makes work easier and more comfortable.

All of that would be impressive enough on its own... but this glove also has outstanding durability. In tests, it withstands 18,000 abrasive cycles per millimetre - twice as good as most other gloves in its class.

Sound like the sort of glove you need? Then make sure you order today.

Features and Benefits

- 360° breathability - patented micro-foam nitrile coating offers 360° breathability, making it the most breathable glove on the market today.
- 25% thinner than most foam nitrile gloves on the market whilst offering twice the mechanical performance.
- Form, fit and feel - mimics the "hand at rest", reducing hand fatigue and increasing comfort.
- Latest knitting technology - utilised to produce smooth and rounded fingertips, improving fingertip sensitivity.
- Consistent liner penetration - from the nitrile, leaving only the soft liner resting against the skin.
- Optimised grip delivered through our micro-cup finish allows for a controlled grip. Our GripTech "micro-cup" finish enhances grip properties so parts are handled more securely. In addition, it reduces hand

fatigue associated with a lack of a proper grip.

- MaxiFlex has outstanding durability withstanding 18,000 abrasive cycles per millimetre thanks to the use of the DuraTech coating technology in the coating construction. Per millimetre of coating MaxiFlex has over twice the resistance of another other glove in its class.

The glove is available in 8 sizes and 4 dip lines

Applications

- DIY
- Finishing and inspection
- Gardening
- Handling of small components
- Primary, secondary and final assembly
- Maintenance
- Logistics and warehousing
- Using tools and instruments
- Wiring operations
