- EN 388:2016: 4244
- EN 407: 413344

Product Details

Needing a reliable welding glove? Then you need to have a look at our Armour Leather Red Welding Glove.

It's made from premium split leather, with a one piece back with cotton lining for comfort. It also features welded seams and a reinforced thumb, with a double layer of leather between the thumb and forefinger and down the palm. This strengthens the glove and gives you more protection.

But what makes this glove a standout for us is the Kevlar stitching. Gloves that are stitched with cotton can often be burned by sparks, causing them to fall apart eventually. Not with this glove. The fire-resistant Kevlar stitching means the glove will last far longer than many competing products.

Suitable for all welding, engineering and foundry work.

Features and Benefits

- Premium split leather welding glove
- One-piece back with cotton lining for comfort
- Kevlar stitched to resist burning from sparks
