MaxiChem Chemical Resistant 35cm Gauntlet

Code: 56635

Features

- Unit: Pair
- Size: M - 2XL
- Length: 35cm
- Pack Qty: 12
- Carton Qty: 72
- Coating: Synthetic Latex
- Colour: Green/Black
- EN388: 4121
- EN374-2: Level 3
- EN374-3: AKL
- Liner Fabric: Synthetic Latex

Product Details

Summary

MaxiChem® MaxiChem® is designed and developed for those working with chemicals requiring longer and higher levels of protection. MaxiChem® is tested and certified according to EN 374-3. Chemical resistance- is delivered through our LiquiTech technology platform.

Applications:

- Gear box assembly
- General handling
- Handling small castings
- Handling of small components
- Light metal fabrication & parts handling
- Primary, secondary and final assembly
- Shock absorber assembly
- Maintenance

LIQUItech

FOR PROTECTION AGAINST OILS, LIQUIDS AND CHEMICALS

Chemical resistance - is delivered through our LIQUItech® technology platform.

Chemical	Performance level
Sulphuric Acid	4
Methanol	3
Sodium Hydroxide	6

ERGotech

FOR REDUCED HAND FATIGUE

Ultra lightweight - synthetic coating combined with an industry leading super light seamless knit liner provides excellent comfort, sensitivity, fit and dexterity.

Tailored cuff - keeping the cuff close to your hand so maintaining your fingers at the tip of the glove to maximise dexterity.

GRIPtech

FOR BETTER PERFORMANCE

Our micro-cup non-slip grip finish allows for a controlled and superior grip in oily and wet applications. The nonslip grip is only applied where it is actually needed - in the palm area - to ensure flexibility isn't compromised.

HandCare

FOR A GENTLE GLOVE EXPERIENCE

We use our HandCare® Program for every single ATG® product. Not only do we make certain that all the elements used in our manufacturing process are safe for our employees, we also wash all the gloves after the production process as a further step in ensuring cleanliness. During this laundering process, we only use water that is rain-harvested, treated and continually recycled from our own water treatment facilities. This enables us to guarantee our gloves to be "Fresh out of the pack" which is certified by Oeko-Tex® according Standard 100.

And if that wasn't enough our gloves are also dermatologically accredited by the Skin Health Alliance. The Skin Health Alliance seal gives, for the first time in the safety industry, professional glove users the

confidence that ATG®'s full range of gloves are “dermatologically safe” and the science and research behind them is robust.

Of course our whole manufacturing process is in line with the requirements of the European REACH Regulation (Registration, Evaluation, Authorisation and restriction of Chemical Substances). We do not use any SVHC during our manufacturing process.
