Code: EPBMDC100

### Features

- Unit: Box
- Pack Qty: 100
- Carton Qty: 10
- Colour: Blue
- AS/NZS 1270:2002

### Product Details

Introducing the Armour® Metal Detectable Ear Plug - Corded | Class 5, an innovative solution in hearing protection designed by Armour, the leading name in Personal Protective Equipment. These ear plugs are specifically engineered to meet the rigorous standards of AS/NZS 1270:2002, offering a Class 5 SLC(80) rating with a 27dB noise reduction capacity, ensuring superior auditory protection in noisy work environments.

Key features of this product include an integrated neck cord, providing convenience and easy access when not in use. The vibrant colours of the ear plugs not only ensure visual identification but also promote compliance in the workplace. These ear plugs are an economical and convenient choice for settings that demand high comfort, frequent changes, or where hygiene is a critical concern. Designed with user comfort in mind, they are shaped to fit snugly and securely. They have a metal detectable coating which makes them especially useful in environments where you need to be absolutely certain the earplugs haven't found their way into finished goods - such as food service.

Each pair of Armour® Metal Detectable Ear Plugs comes individually packaged in poly bags, ensuring hygiene and ease of distribution. For optimal use and safety, it is advised to handle these ear plugs with clean hands, regularly check for any signs of damage or dirt, and store them in a cool, dry place. They are intended for single use for a maximum duration of 8 hours, after which they should be disposed of, especially if contaminated or dirty. Correct fitting is crucial for effective protection; improperly fitted ear plugs may lead to injury or inadequate hearing protection. Additionally, it's important to be cautious when using corded ear plugs in areas where the cord may become entangled or caught.

The Armour® Metal Detectable Ear Plug - Corded | Class 5 is an essential addition to any safety gear lineup, combining comfort, convenience, and compliance, all while ensuring the highest standards of auditory protection.

### Features and Benefits:

- Integrated neck cord for ease of location when not in use.
- Vibrant colours for visual identification & compliance.
- Economical & convenient option for work environments that demand a high degree of comfort, frequent changes or where hygiene presents a problem for re-usage.
- Metal detectable bullet shaped corded soft foam designed for single use - 8 hours max
- Pairs packaged in individual poly bags.
