- Coating: PU Membrane
- Colour: Yellow/Navy
- Type: Jackets
- EN 342:2017

Product Details

IceKing Waterproof Jacket is designed to handle work environments to -40°C. It features a 300D Oxford Rip Stop outer shell and 150D Polyester internal coated lining. It is ideal for any work where protection from the cold is essential.

Why would you buy this over any of its competitors? The answer is simple – we created the IceKing Waterproof Jacket as well as the rest of the IceKing range because we had so many requests from frozen goods manufacturers complaining about the lack of garment performance in low temperatures. The other products on the market were not doing the job, so many of our clients asked us to come up with something better, and the IceKing Range was the result.

After extensive market research and trials with several well known frozen food manufacturers, the Iceking range was refined and developed. This IceKing jacket, along with the rest of the range, is a specialist garment designed to perform in very low temperatures for prolonged periods.

Features and Benefits

- Suitable for temperatures to -40°C
- 300D Oxford Rip Stop outer shell
- Breathable Fabric
- 150D Polyester internal coated lining
- Latest 'Arctic' thermal insulation technology
- Neoprene hand inserts in arm cuff
