

MaxiDry Plus Gauntlet - 30cm

Code: 56530

Features

- Unit: Pair
- Size: 8/M, 9/L, 10/XL, 11/2XL
- Coating: Synthetic Latex
- Colour: Blue/Black
- Length: 30cm
- Liner Fabric: Synthetic Latex
- EN 374-1:2016 Type B
- EN 388:2016: 4121A

Product Details

Customers have been asking us to make an oil repellent MaxiFlex that's still super thin, flexible, dexterous and comfortable. So we did. Here it is. We call it MaxiDry.

MaxiDry Plus is designed and developed for those working in areas or applications that require chemical protection. MaxiDry Plus is tested and certified according to EN 374, "low level chemical resistance".

Just like the MaxiFlex, the MaxiDry is an ultra-lightweight glove. It uses an industry leading seamless knit liner so you get maximum dexterity. It also features a locking cuff, ensuring the glove doesn't slip while in use.

It's ideal for general handling, light metal fabrication & parts handling, and assembly work.

Features and Benefits

- Ultra lightweight - synthetic coating combined with an industry leading super light seamless knit liner provides excellent comfort, sensitivity, fit and dexterity.
- Tailored cuff - keeping the cuff close to your hand so maintaining your fingers at the tip of the glove to maximise dexterity.
- Locking cuff - ensures the glove doesn't slip on the hand: an exclusive elasticated support in the wrist area provides a "locking" effect for a close and snug fit.
- Optimised grip delivered through our micro-cup finish allows for a controlled grip. Our GripTech® "micro-cup" finish enhances grip properties making parts are handled more securely. In addition, it reduces hand fatigue associated with a lack of a proper grip.
- The LiquiTech® barrier has been designed to deliver lightweight, flexible coatings applied to very fine gauge seamless knit liners. LiquiTech® provides liquid repellence, along with low and high level chemical resistance, while retaining superb levels of comfort not normally associated with liquid repellent and chemical resistance gloves.
- Applications: Engine and power train, Gear box and transmission assembly, General handling, Handling small castings, Handling of small components, Light metal fabrication & parts handling, Primary, secondary and final assembly, Shock absorber assembly, Maintenance
