- Size: 8/8.5, 9/9.5, 10/10.5, 11/11.5
- Material: Goat Skin
- EN 388:2016: 2122

Product Details

Introducing the Flash® Low Voltage Leather Over Glove, a solid addition to our safety gear lineup, designed for professionals who demand both protection and dexterity in their work. These over gloves, crafted from high-quality goat skin, offer an exceptional balance of flexibility and durability, ensuring that your hands are safeguarded while retaining full range of motion.

Adhering to the rigorous standards of EN 388:2016 and achieving a performance rating of 2122, the Flash® Leather Over Gloves provide robust protection against mechanical risks, including abrasion, blade cuts, tearing, and puncture. This makes them an ideal choice for a wide range of applications, from electrical work requiring additional mechanical protection to general handling tasks where durability and dexterity are paramount.

The choice of goat skin material is no coincidence; known for its superior softness and flexibility, goat skin allows for a snug fit and enhanced tactile sensitivity, enabling precise and safe handling of tools and equipment. Despite its softness, goat skin is remarkably durable and resistant to wear, ensuring that these gloves stand up to the demands of rigorous professional use.

Features and Benefits

- EN 388:2016 Certification (2122 Rating): Offers certified protection against abrasions, cuts, tears, and punctures, suitable for a variety of work environments.
- Hand-Picked Goat Skin Material: Provides exceptional softness and flexibility for maximum comfort and dexterity, without compromising on durability.
- Designed for Versatility: Ideal for use as over gloves for electrical protection or for standalone use in tasks requiring high levels of tactility and precision.
- Enhanced Durability: Goat skin is known for its wear resistance, ensuring that these gloves can withstand the rigours of daily professional use.
- Optimal Fit and Comfort: The natural properties of goat skin allow for a glove that moulds to the wearer's hand, offering a personalised fit that improves with use.
