- EN 407: X1XXXX
- Sanitised

Product Details

The Blade Industrial glove is one of the strongest gloves we have available – achieving a full EN388 mechanical rating of 4543C. It is superior in terms of abrasion, tear and cut resistance. If you're after a glove with full blade and point protection, then you can't do better than the Blade glove.

This glove features an excellent grip, thanks to the microfoam finish, making the glove especially good for handling slippery objects. It also has world-class flexibility and dexterity, which prevents fatigue and makes work easier.

It is also great value for money, as you can wash it up to 12 times without reducing the level of cut protection. It's ideal for general and heavy industrial use, where full blade and point protection is a necessity. It's excellent for when handling oil and chemicals, and features reinforcement between the thumb and forefinger, for added strength.

If you're needing the best protection at a great price, then order today.

Features and Benefits

- Multiple launderings while keeps very good performance
- Microfoam finish offers excellent grip
- Reinforcing between thumb and forefinger for additional strength and wear
- Excellent resistance to oil and chemicals
- Excellent flexibility and dexterity minimizing hand fatigue
