Orion Insulated Glove - Class 4

Code: GLOVE4

Features

- Unit: Pair
- Pack Qty: 1
- Carton Qty: 5
- Size: 9.5, 10, 10.5, 11, 11.5, 12
- Colour: Black
- Label: Orange
- Rating: Class 4 (36000V)
- NBR 10622
- ASTM D120

Product Details

The Orion® Insulated Glove - (36000V) Class 4 is your assurance of exceptional electrical safety. Compliant with industry standards, including NBR 10622 and ASTM D120, these gloves offer dielectric properties for reliable protection against electric shocks and severe injuries. Being made of compounds resistant to ozone (Type I), they ensure a longer useful life while maintaining the same protective performance.

Crafted from premium materials by a company dedicated to personal safety in the power utility industry, these gloves provide long-lasting durability and resistance to wear and tear. Orion's expertise in rubber manufacturing guarantees a high-quality rubber compound that remains flexible and maintains dielectric properties even after extended use. The textured surface enhances grip and control for safe electrical work.

With over 120 years of experience in rubber manufacturing and 60 years in glove manufacturing, Orion is a trusted name in both low voltage (LV) and high voltage (HV) ranges.

Features and Benefits:

- Compliant with industry standards, including NBR 10622 and ASTM D120.
- Dielectric properties for electrical shock protection.
- Premium rubber compound from a company with over a century of rubber manufacturing experience.
- Textured surface for enhanced grip and control.
